

Internship :: Let's Learn & Build Together!

What

We are Commudle, a home for Developers and their Communities to share knowledge, network and grow together.

Commudle has close to 30,000 Developer Sign ups and we are finding ways to bring value to all of these amazing people and get the passionate communities to be reachable to a lot more people.

We are at a very early stage so you'll see that your work goes live very fast and the journey of how the platform evolves will be very interesting to be a part of.

Will This Be Paid?

Yes.

We strongly believe that interns learn a lot and contribute a lot too. And all that effort should result in a stipend as well.

Stipend

- + INR 10,000 / month
- + We like to be transparent in terms of money, this is a fixed amount. You will get a joining and completion letter.

Time Requirements

- + **Start Date: May, 2021 (preferably in the 1st week)**
- + This is a full time internship and is fully flexible. Yes, there will be timelines, but they will be calculated based on your college and exam timings. **Active commitment to work is all we need.**
- + There's no minimum or maximum number of hours we expect, it's all about completing the work and picking up the next one, while focusing on good health too. On an average our teammates spend about 48 hours per week.
- + Total Duration: Minimum 2 months to maximum 5 months. Extension depends on your performance and availability of position with us.
- + 1st month will be the probationary period

/ Software Developer Intern

Number of people needed: 2

Role: You will be primarily working on building and improving new and existing features in Commudle. You will initially begin from improving the existing features on the front end in terms of the already collected feedback and then develop new ones as soon as we are comfortable with the source code.

Skills Required:

- + Angular 2+: If you don't know it, it's easy to learn via a tutorial [<https://angular.io/tutorial>]
- + RubyOnRails (optional)
- + Ability to explore, find and implement the best coding methodology. Having worked on live projects will add to the possibility of being selected

How To Apply

1. Apply on this link: [<https://commudle.com/fill-form/681>]
2. We will send you a small task to test your skills in 48 hours (If you don't have them, you can learn and complete the task)
3. Results will be communicated on email itself.

What If I'm Not Selected

It's an internship, not life. You didn't get selected means we found someone who was more suitable for this role at this point of time. Not getting selected is by no means a judgement on your abilities. It is just the analysis of the interviewer.

Will There Be More Internships In The Future?

Yes. We want to grow our team and are actively working on it.

What If I Am Selected

Congratulations! Further steps to be communicated on email. Brush up your web development skills

**Disclaimer: This is a public document, please feel free to share it across anyone who you think is going to be a good fit*
